

SPECIAL PROGRAMMES OVERVIEW

SUTD offers a number of special programmes catering to high-achieving students who are interested in technology and its adjacent fields, and who wish to stretch themselves to their fullest potential during their undergraduate studies. On top of the normal undergraduate curriculum, students admitted in a special programme will take additional courses and have additional experiences that will open up truly diverse career pathways for them in technology and complementary areas.

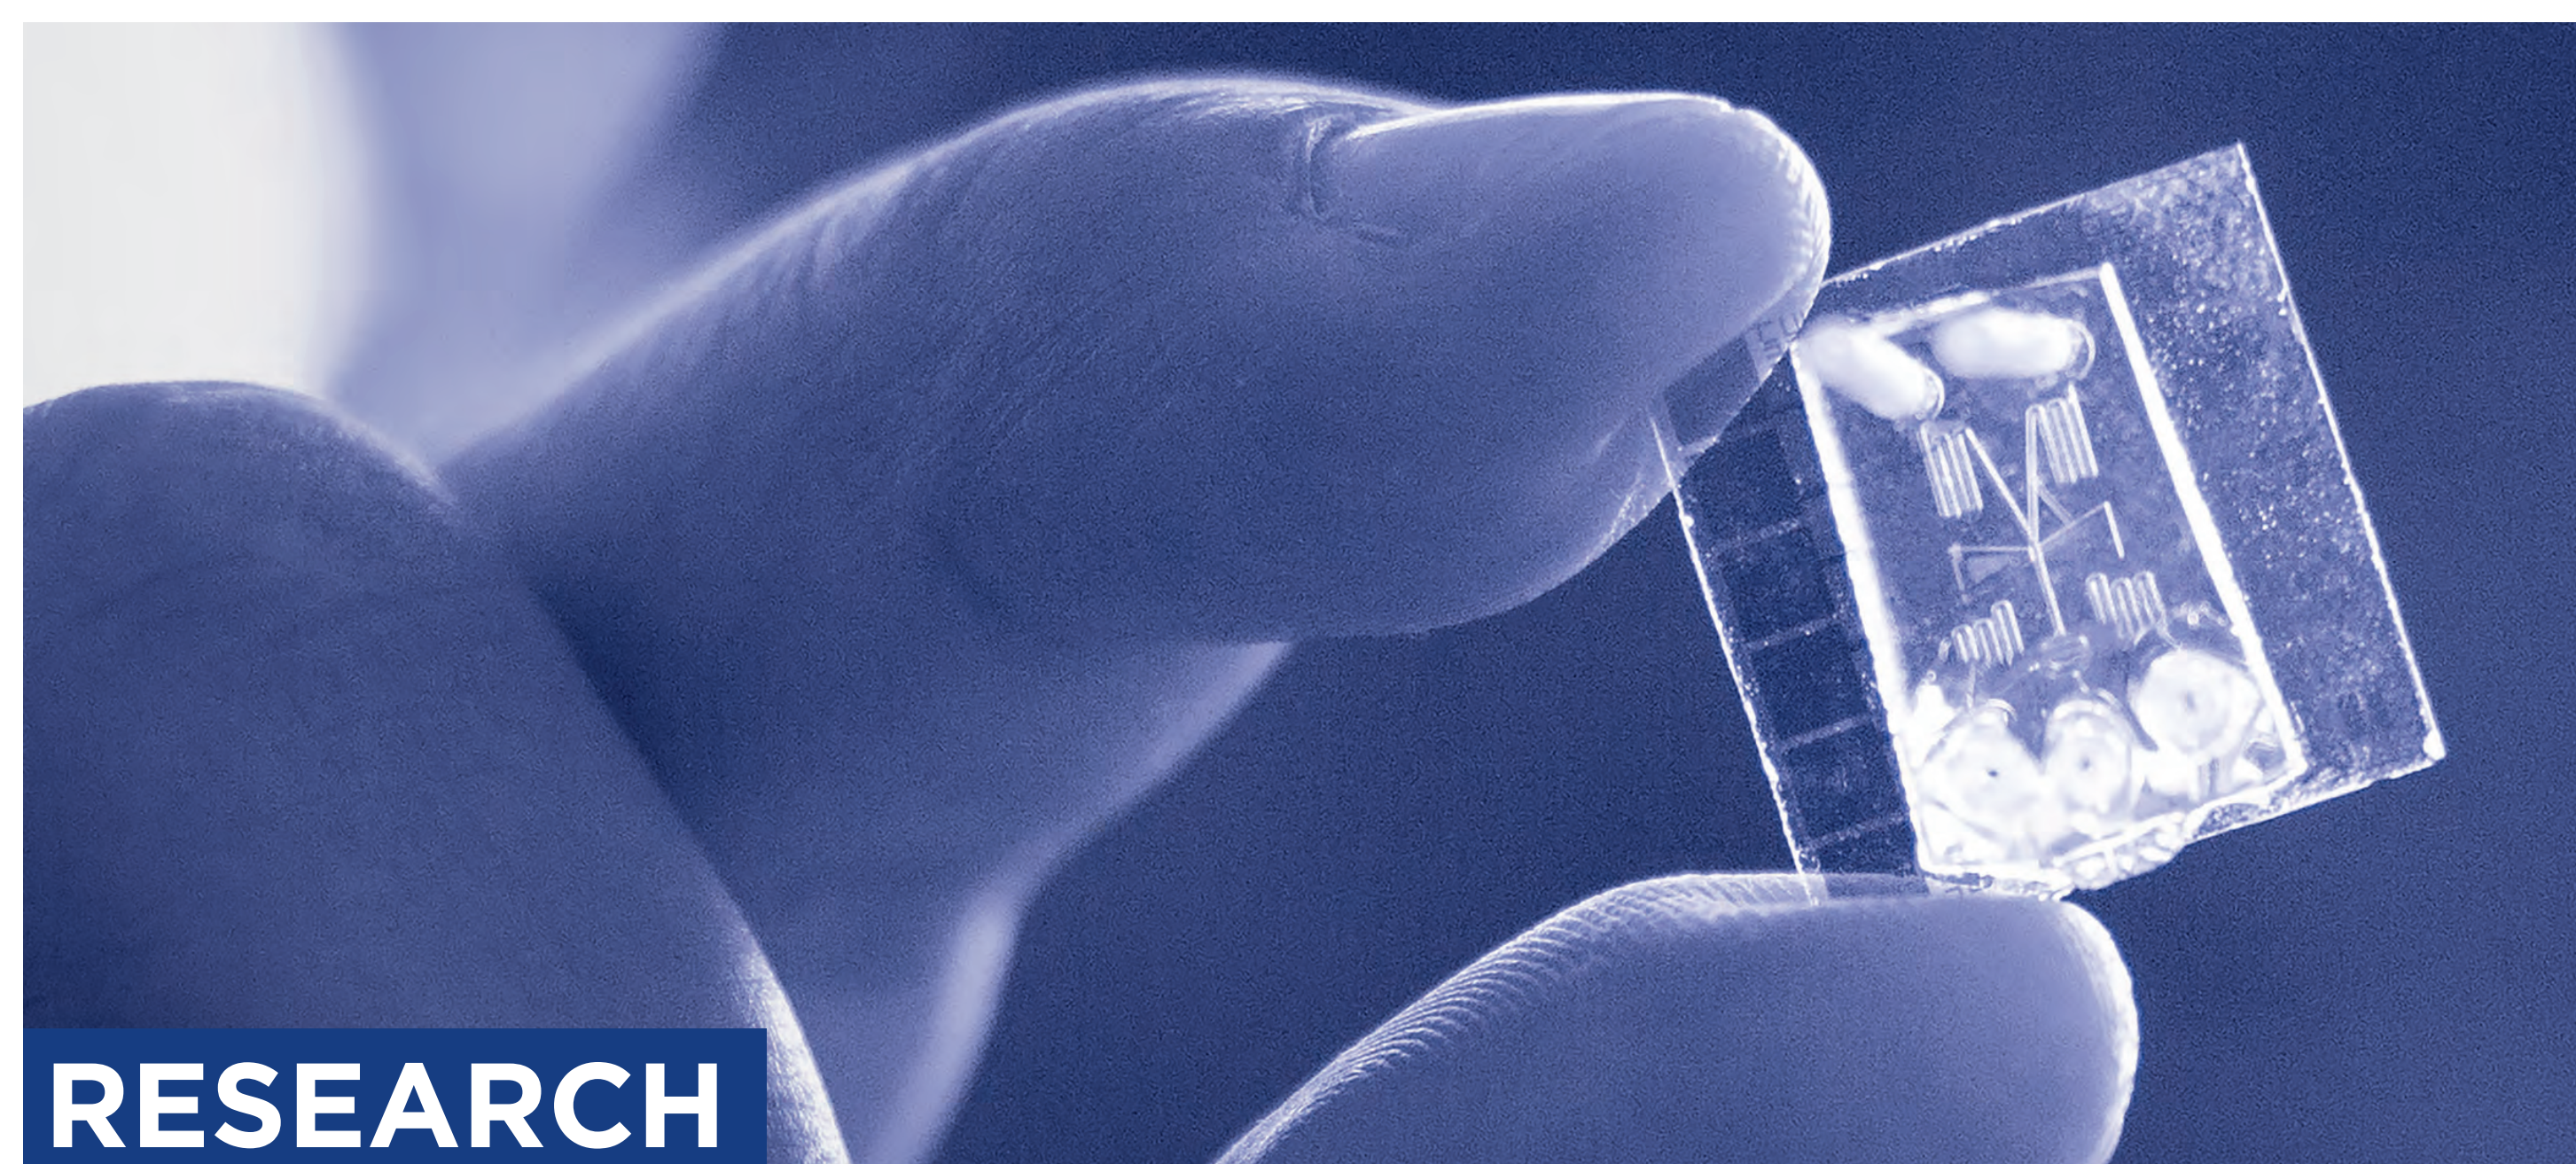

The 3 special programmes offered to incoming students include:

ENTREPRENEURSHIP

SUTD Technology Entrepreneurship Programme (STEP)

Nurtures technology entrepreneurs with a global mindset and perspective. STEP students will graduate concurrently with a Bachelor of Science/Engineering (in one of our majors) and Masters of Science in Technology Entrepreneurship after 10 terms.

RESEARCH

SUTD Honours and Research Programme (SHARP)

Caters to bright students with an interest to pursue a research-oriented career. With the research immersion locally and overseas during their undergraduate studies, SHARP students can subsequently choose to pursue their graduate studies either at SUTD (PhD or M.Eng (Research)) or overseas.

MEDICINE

SUTD-Duke-NUS Special Track

Nurtures a special group of clinician innovators who can apply technology and design to accelerate healthcare innovations and improve health outcomes. Students gain conditional admission to Duke-NUS Medical School's Doctor of Medicine (MD) programme at the same time as their admission to SUTD's undergraduate studies.

APPLICATION FOR SPECIAL PROGRAMMES

You should apply for the special programme you are interested in at the same time as your application for admission to SUTD via our online application process. As places for the special programmes are limited, they are also highly competitive. Apart from outstanding academic results and strong CCA records, we also look for specific traits and qualities relevant for the specific programme. The eligibility and scholarship for the special programmes are summarised as follows:

SPECIAL PROGRAMME	ELIGIBILITY	SCHOLARSHIP
SUTD TECHNOLOGY ENTREPRENEURSHIP PROGRAMME (STEP)	All nationalities	STEP Scholarship for Singapore Citizens (SC) only
SUTD HONOURS AND RESEARCH PROGRAMME (SHARP)	All nationalities	SUTD Scholarships (on top of SHARP programme benefits such as research stipends and grants)
SUTD-DUKE-NUS SPECIAL TRACK	SC and Permanent Residents (PR) only	SUTD Scholarships for SC/PR
