SPECIAL PROGRAMMES
TECHNOPRENEURSHIP · RESEARCH · MEDICINE
SCHOLARSHIPS
On top of our majors, SUTD’s suite of special programmes are designed to stretch your abilities beyond technology and design.

SUTD SCHOLARSHIPS

100% bond-free

More than 100 scholarships with funded overseas exposure
The 10-term integrated programme aims to nurture technically-grounded entrepreneurial leaders and innovators with a global perspective.

The 1-year global immersion will equip you with skills in technology entrepreneurship and business management that complement and build upon what you will learn in the design-centric engineering and architecture disciplines.

Graduate with a Bachelor of Engineering or Science degree and a Master of Science in Technology Entrepreneurship degree.

Diverse careers await STEP graduates, with opportunities to take on a range of career choices in start-up industry sectors, as intrapreneurs in multinational corporations or even to start your own tech business.

* Choose between Entrepreneurship Capstone and Capstone.
* Students may also embark on an exchange in Term 8 with the possibility of a follow-up summer overseas internship.

---

**HIGHLIGHTS**

- **Live, study, work and play globally**
  - 8-term technology entrepreneurship immersion in Singapore
  - A year of global exposure

- **Innovative curriculum for experiential learning**
  - Combines the mastery of a specialised technological field with entrepreneurship acumen
  - Design-centric, hands-on education
  - Mandatory entrepreneurship workshops
  - 16-week local internship to gain industry exposure

- **1-year global immersion**
  - Immerse in the entrepreneurial culture and environment in different countries/continents
  - Opportunity to undertake a work immersion
  - Take management and entrepreneurship courses at our partner universities* overseas

- **Mastery of deep tech in entrepreneurship**
  - A unique programme that introduces you to Singapore’s entrepreneurship scene and venture-capitalist ecosystem
  - A Master of Science (MSc) project in Technology Entrepreneurship

---

*SUTD’s current partners include University of California Berkeley Extension, Zhejiang University School of Management and Xi’an Jiaotong University. This list is subject to change. Students are to refer to the prevailing list at year of overseas stint.
SUTD TECHNOLOGY ENTREPRENEURSHIP PROGRAMME (STEP)

SUTD HAS HELPED TO NURTURE MORE THAN 40 START-UPS TO DATE

**Codomo** aims to instil design thinking and computation thinking in children through delightful educational initiatives. The start-up launched Potato Pirates, dubbed the tastiest coding card game, and raised over $250,000 on Kickstarter.

Developed with artificial intelligence (AI), **Bifrost** is a data engine that creates virtual worlds simulating rare, dangerous occurrences to capture rich data at a fraction of the time and cost. Bifrost will help its first customer, SMRT, with safety checks when trains enter or leave depots.

**Ring Theory** develops smart payment wearables for banks, public transport authorities including the Massachusetts Bay Transportation Authority and wearable tech companies. Winner of the SG Mark 2018.

**OUR ENTREPRENEURIAL ECOSYSTEM OPENS UP OPPORTUNITIES**

**ENTREPRENEURSHIP UNDERGRADUATE RESEARCH OPPORTUNITIES PROGRAMME (UROP)**
Be matched with research centres and embark on projects based on your interests.

**ENTREPRENEURSHIP VENTURE**
Put your entrepreneurial finesse and technology design knowledge to use — help tackle real problems faced by the SUTD community.

**INTELLIGENT PROPERTY (IP) CLINICS**
Understand the IP and patent filing process, including Technology Disclosure (TD) writing.

**STARTsomething@SUTD**
Gain knowledge and skills to navigate the start-up ecosystem with this 3-term experiential entrepreneurship programme.

**INCUBATION SPACE**
Gain access to co-working labs and facilities that can bring your ideas to life.

**ENTREPRENEURSHIP COURSE**
Learn the fundamentals of entrepreneurship, innovation and new venture creation.
**FROM OUR STUDENTS**

The **East-West** design of this programme drew my interest and allowed me a **wide exposure to entrepreneurship**. I’ve had opportunities to pitch, network, visit manufacturers, and build my business ideas — all even before I’m in the U.S. and China.

Ang You Shan,  
Hwa Chong Institution alumnus

I’ve had the privilege to **collaborate** with **diversely skilled** students on several passion projects, with one involving the creation of a habit-inculcating companion robot. We were also **immersed** in a slew of **entrepreneurial experiences**, from crowdfunding to eventually pitching to investors.

Chok Hao Ze,  
Anglo-Chinese Junior College alumnus

**STEP** gave me the necessary **skillsets and resources** to start my own business. The programme puts us with **highly motivated** peers and provided us networking opportunities and overseas exposure. I’ve **started two companies** and gone for nine (and counting!) entrepreneurship-related trips!

Jerry Neo Theng Tat,  
Ngee Ann Polytechnic alumnus  
*CEO and co-founder of Snap Labs, a start-up that does mixed reality applications*

**STEP** has **empowered** me to pursue my ideas freely and confidently, knowing that I have the support of SUTD. As a sophomore, I have already **embarked on several research projects and co-founded a start-up**. I doubt I’ll get this many opportunities elsewhere!

Daryll Wong Ye Qi,  
Anderson Junior College alumnus  
*Co-founder of Oculario, a start-up tackling myopia in young children*

**ADMISSION REQUIREMENTS**

- **Outstanding academic results.**
- **Strong communication skills and leadership potential.**
- **Entrepreneurial, innovative, dynamic, resilient, risk-taking and responsive, with a strong interest in technology.**

**APPLICATION PROCESS**

1. Indicate your interest to apply for **STEP** in your online admission application.
2. Complete two short-response questions on your motivation, entrepreneurial experience and interest for applying to this programme.
3. Shortlisted candidates will undergo the **STEP Applicant Day** and attend an interview thereafter.

To apply, visit [sutd.edu.sg/apply](http://sutd.edu.sg/apply)
The structured 8-term research-oriented programme is for academically bright students with a highly inquisitive mind, and who aspire to pursue a research-related career later in universities, research labs and high-tech industries.

Through 1:1 mentorship, you will be equipped with cross-disciplinary capabilities to develop breakthrough solutions that will address current and future trends, thereby transforming the industries of tomorrow.

Graduate with a Bachelor of Engineering or Science degree, with the option to pursue a graduate degree such as a Doctor of Philosophy in Engineering or a Master of Engineering (Research).
HIGHLIGHTS

Funded research

• $7,500 in research stipends* to conduct an undergraduate research project
• $7,500 in research travel grants and other research related expenses

Three terms of Honours sessions

• Advanced classes with research projects on top of regular Freshmore subjects to equip you with deeper knowledge over a wide range of topics, such as special topics in Mathematics and Physical Sciences

In-depth technical training in research

• Multi-disciplinary curriculum and research exposure
• 1:1 close faculty research supervision
• Five terms of research projects
• Opportunity to develop and present research thesis

Global exposure and opportunities

• Overseas immersive experience in research (internship, presentation of research paper at funded overseas conferences)
• Funded summer programme at a partner university under the Global Leadership Programme (GLP)*
• Learn from and network with prominent scientists

*Stipends will be capped at $1,500 per term to be drawn from Term 4 upon satisfactory progress in a research project pursued in close interaction with a faculty member

*For those awarded the SUTD Global Excellence Scholarship, SUTD Global Distinguished Scholarship or SUTD Global Merit Scholarship

* SUTD Undergraduate Research Opportunities Programme. For more details, please visit sutd.edu.sg/urop
* For continuation in SHARP, students must pass at least two Honours sessions and attain a minimum CGPA of > 3.5 at the end of Term 3. All students are to indicate their choice of major after the end of Term 3.
* SHARP students are also eligible for overseas exchange in Term 6.
New Urban Kampung
A $6M tie-up with HDB to revive the kampung spirit. Interdisciplinary research teams of psychologists, architects and engineers combine data analytics and behavioural studies to develop new community-focused and sustainable architectural designs.

Led by Associate Professor Chong Keng Hua

A breakthrough in cancer treatment
A highly efficient single cell sorting technology that holds great potential for non-invasive cancer diagnosis – a big leap towards precision medicine in cancer treatment.

Led by Associate Professor Ye Ai

Sprinting towards 5G
Partnering with M1 to explore the potential uses of 5G, an indoor network testbed of 5G small cells at SUTD is the first indoor 5G system to be deployed in Singapore. Areas of focus include real-time remote operation of robots, augmented-reality content and e-scooters.

Led by Associate Professor Tony Quek

A new bacterial revolution
Nanoimprint technology is the design, engineering and fabrication of surface textures onto existing polymeric materials – textures inspired by the natural world. The surface of a shark’s skin is perfect for anti-fouling which prevents bacteria from accumulating. Lesser bacteria colonises on shark skin-inspired films compared to those on controlled surfaces in hospital environments.

Led by Associate Professor Low Hong Yee

First of its kind in fully automated cleaning
A pioneering transdisciplinary effort between architecture and engineering which includes designing robot-inclusive spaces. Dr Rajesh is also a co-founder of LionsBot whose cleaning robots are deployed at Jewel Changi Airport.

Led by Assistant Professor Mohan Rajesh

Clarifying the intelligence of AI systems
AI might be able to identify a picture of a ship based on the presence of water, but can it do so with the presence of an actual ship? The novel Spectral relevance analysis (SpRAy) makes it possible to detect undesirable decision-making even in very large data sets.

Led by Assistant Professor Alexander Binder

3D printing of nanostructures
Created through a special heat-shrinking process, structural colours are the result of light scattering off tiny nanostructures on the smallest possible scale. The uniqueness of the structures means that the process could potentially be applied in anti-counterfeiting efforts.

Led by Associate Professor Joel Yang
FROM OUR STUDENTS

I was exposed to various advanced topics such as cryptography and quantum mechanics. Although sessions were demanding, instructors were very willing to clarify my doubts. SHARP stretches even the best and brightest minds to develop interdisciplinary researchers of tomorrow.

Vanessa Chia Yun Yao, River Valley High School alumnus

By putting students on the front lines of research, SHARP inculcates in students an attitude of enquiry. I chose SHARP because it allows me to dig deeper into the why and how, explore new approaches and create new insights.

Jia Shuyi, National Junior College alumnus

SHARP has been extremely challenging and fulfilling. We are exposed to exciting topics that cultivate a strong interest in research, with opportunities to pursue our own passion areas.

Han Xing Yi, Dunman High School alumnus

ADMISSION REQUIREMENTS

Outstanding academic results with ‘A’s in Mathematics and a Science subject at H2, or the equivalent. Students who have offered a H3 subject and done well will also be considered favourably.

Participation in research-related initiatives is not compulsory, but preferred (e.g. SUTD Research Mentorship Programme, Singapore Science and Engineering Fair, etc.).

Passion for research with critical thinking and analytical skills.

APPLICATION PROCESS

1. Indicate your interest to apply for SHARP in your online admission application.

2. Complete two short-response questions on your research experience and motivation for applying to this programme.

3. Shortlisted candidates will complete an assignment and attend an SUTD admission interview thereafter.

To apply, visit sutd.edu.sg/apply
A unique collaboration between SUTD and Duke-NUS Medical School, the SUTD-Duke-NUS Special Track aims to nurture future innovators and entrepreneurs who are adept at both practising medicine and harnessing technological advancements across disciplines to impact healthcare.

The technology and design focused curriculum at SUTD equips you with a background in engineering or architecture, helping you to think creatively and work across disciplines. Be skilled at treating patients, and at the same time contribute in areas such as artificial intelligence, robotics and healthcare product design.

Graduate with a Bachelor of Engineering or Science degree at SUTD and a Doctor of Medicine (MD) degree at Duke-NUS Medical School.
HIGHLIGHTS

Immersive experiences

• Curriculum specially designed with SingHealth clinicians – you are exposed to a range of healthcare issues, environments and projects

• Summer internship in a healthcare environment, locally or overseas

• Visit hospitals overseas on your Freshmore Asian Cross-curricular trips (FACT) to experience different healthcare environments

• Complete healthcare-related projects for the Undergraduate Research Opportunities Programme (UROP) and in your final two terms for Capstone

• Stay engaged with Duke-NUS through seminars, workshops and visits

Mentorship and enrichment sessions

• Advising Sessions with Duke-NUS Medical School Faculty

• Introduction to TeamLEAD

• MCAT Introduction Workshop

• Fundamental of Science workshops

• Duke-NUS Medical Specialties Workshops

• Duke-NUS Alumni Clinical Observership

Work closely with medical professionals

• Be assigned clinical and technology faculty mentors during your course of study

• Advising sessions with Duke-NUS Medical School faculty and clinical observership with Duke-NUS alumni

^ Students are required to complete at least one internship in the healthcare sector.
^ Students must complete their MCAT by Term 6.

Students are required to submit an MD application in Term 6*. This application is a clerical necessity and does not imply that students are re-applying to medical school.

Students must complete their Medical College Admissions Test (MCAT) and other requirements by Term 6 in order to apply for MD.

All students will be awarded scholarships for their undergraduate studies at SUTD. The application for MD programme scholarship and financial aid shall be made in Term 6.

SUTD Duke-NUS Medical School
FROM OUR STUDENTS

Through the SUTD-Duke-NUS Special Track, I can be a practising clinician while using healthcare innovation to help others. This gives me an extremely valuable opportunity to contribute more to the healthcare industry and simultaneously, fulfil my passion for medicine and engineering.

Glenda Wee, Raffles Institution alumnus

Join our global overseas exchange programme to study healthcare-related courses in world-class universities like Stanford University.

Chan Yan Zhi, Victoria Junior College alumnus

The SUTD Duke-NUS Special Track enables me to get the best of both worlds of engineering and medicine. It empowers me to be the clinician who can improve our healthcare system through technological innovations, being the drive of change to solve a range of problems from simple quality of life improvements to community-wide healthcare problems.

The design-focused engineering curriculum at SUTD and research-intensive medical programme at Duke-NUS provides me with the versatility to shuttle from bench-to-bedside, and on a global scale, the confidence to effectively tackle healthcare issues beyond patients in the clinic.

Loh De Rong, NUS High School alumnus

There is a strong synergy between the two fields — medicine and engineering. Being part of both enables me to have a rooted connection to the healthcare field whilst directly empowering and improving lives through new innovations and technologies.

Nur Sarah Binte Ibrahim, Temasek Junior College alumnus

The SUTD-Duke-NUS Special Track enables me to get the best of both worlds of engineering and medicine. It empowers me to be the clinician who can improve our healthcare system through technological innovations, being the drive of change to solve a range of problems from simple quality of life improvements to community-wide healthcare problems.

Chan Yan Zhi, Victoria Junior College alumnus

The design-focused engineering curriculum at SUTD and research-intensive medical programme at Duke-NUS provides me with the versatility to shuttle from bench-to-bedside, and on a global scale, the confidence to effectively tackle healthcare issues beyond patients in the clinic.

Loh De Rong, NUS High School alumnus

There is a strong synergy between the two fields — medicine and engineering. Being part of both enables me to have a rooted connection to the healthcare field whilst directly empowering and improving lives through new innovations and technologies.

Nur Sarah Binte Ibrahim, Temasek Junior College alumnus

Indicate your interest to apply for the SUTD-Duke-NUS Special Track in your online admission application. Successful applicants of the programme will receive a conditional admission offer for the Doctor of Medicine (MD) programme at Duke-NUS. Students are expected to maintain a stipulated academic performance and fulfill conditions stated in the conditional offer for successful admission into the MD programme upon their graduation from SUTD.
Outstanding students can be considered for attractive, bond-free scholarships either by SUTD or supported by donors. These scholarships provide opportunities for overseas exposure as well as for the development of leadership skills as a University Ambassador.

All scholarships are merit-based, though some donor scholarships may give special consideration to those with financial need.

Scan for more about SUTD scholarships

SUTD GLOBAL EXCELLENCE SCHOLARSHIP

• Covers subsidised tuition fees for the normal duration of the bachelor degree programme (eight academic terms)
• Grant of S$9,000 for overseas programmes*
• Study-related allowance of S$7,000 every two academic terms
• Grant of up to S$15,000 for either SUTD PhD / Master’s / M.Arch programme, or selected SMU Master’s programmes (within three years of graduation from SUTD)

SUTD TECHNOLOGY ENTREPRENEURSHIP PROGRAMME (STEP) SCHOLARSHIP

• Covers subsidised tuition fees for the normal duration of the bachelor degree and master degree programmes (up to 10 academic terms)
• Up to 30 bond-free scholarships for each intake
• Open only to Singapore Citizens
• Covers full study-related expenses incurred during the 1-year global immersion

SUTD GLOBAL DISTINGUISHED SCHOLARSHIP

• Covers subsidised tuition fees for the normal duration of study for the bachelor degree programme (eight academic terms)
• Study-related allowance of S$7,000 every two academic terms
• Grant of S$9,000 for overseas programmes*

SUTD GLOBAL MERIT SCHOLARSHIP

• Covers subsidised tuition fees for the normal duration of study for the bachelor degree programme (eight academic terms)
• Grant of S$9,000 for overseas programmes*

SUTD UNDERGRADUATE MERIT SCHOLARSHIP

• Covers subsidised tuition fees for the normal duration of study for the bachelor degree programme (eight academic terms)

*May be applied towards one (at S$9,000) or two approved overseas programmes (at S$4,500 per programme) of at least 4 weeks’ duration each
